

Supernova Latex Performance

Supernova is a backlit polyester fabric which provides outstanding color consistency and excellent image sharpness when printed. This textile is manufactured with a superior print receptive treatment. **Supernova** features a uniquely formulated, proprietary coating to enhance performance and ink fastness of the graphics when printed with Latex Inks. After imaging, this advanced platform displays a superior color range. The backlit quality of this knitted fabric provides for excellence in illuminated graphics and extra appeal that is most popular in the retail and tradeshow settings.

This bright white, 100% polyester fabric meets NFPA 701 FR specification. The best applications for **Supernova** include high-end retail POP, banners, tradeshow booths, backdrops and interior decor.
