

Triple White DIRECT PRINT TEXTILE

Our **Triple White DIRECT PRINT TEXTILE** is a woven polyester fabric, engineered especially for printers who demand high performance textiles for direct printing. After imaging, this media is designed to provide outstanding color consistency, excellent image sharpness and a wide color range.

This triple-layered fabric is engineered to block images from the print surface and to prevent image washout due to lighting behind the sign. It is a related banner media to the **Triple White** in our line of Dye Sub Performance textiles. Both fabrics have similar constructions and benefits, with different ink compatibilities. Applications for **Triple White** include retail POP, indoor banners, retractable banner stands, backlit display frames, theatrical displays and tradeshow graphics.

Material	Polyester
Finish	Print Receptive
Weight	7.5 oz. per square yard
Flame Resistance	NFPA 701
Available Widths	Up to 124"

Ink Compatibility:

UV	Solvent	Eco-Solvent	Latex	Screen Print UV	Screen Print Water Base	Aqueous/Pigment	Dye-Sub Transfer	Direct Disperse
