

# Impress with Dye Sub Performance Textiles

Our Dye Sub Performance Textile line is engineered specifically for printers who demand upscale look and performance with dye sub transfer-only ink compatibility and pricepoint. Available in widths from 60" to 126", this high performance line provides a brilliant platform for printing quality banners, retail POP, backlit displays, tradeshow exhibits, advertising displays and fine art. All fabrics are uncoated, flame retardant and feature a bright whitepoint. After imaging, the media provides outstanding color consistency, excellent image sharpness and a wide color range.

**Tri Poly** An 8 oz. woven, backlit polyester fabric. This fabric is printed for both frontlit and backlit advertising and displays. Common applications include backlit display frames, theatrical displays, tradeshow graphics, banners and retail POP displays.

**Heavy Knit** A 9 oz. heavyweight, bright white knitted polyester fabric which resists wrinkles. Common applications include retail POP displays, backdrops, banners and tradeshow graphics.

**Display Fabric** A 6.5 oz. mid-weight fabric constructed with a tight, wrinkle-resistant hand. Common applications of this knitted fabric include theatrical displays, tradeshow graphics, display frames and interior decor.

**Ultra White Blockout** An 8 oz. woven, double-sided bright white fabric that is engineered with a black blockout layer in the center for beautiful imagery and excellence in double sided graphics. Common applications include banners, blockout curtains, retail POP displays and tradeshow graphics.

**Triple White** A 7.5 oz. triple-layered woven fabric that is engineered to block images from the print surface. Common applications include retractable banner stands, backlit display frames, theatrical displays, tradeshow graphics and retail POP displays.
